

Table IV. Patients with and without serious complications (bleeding and bile leakage) were compared with the Fisher's exact test; Odds Ratio (OR), 95%-CI and the p-value are shown.

	Without complications (n=369)	Complications (n=9)	OR (95%CI)	P value
Indication				
-Biliary colic	278	3		
-Cholecystitis	84	6	6.7(1.4-42)	0.007
Type of operation				
-Elective	321	8		
-Acute	48	1	0.83(0.0-6.5)	ns
Intra operative cholangiography	90	3	1.54 (0.2-7.4)	ns
