

**Table III.** Postoperative complications. Number and ratio (%). N=105.

	Number	%
Any complication	70	66.7
Major complications	33	31.4
Reoperation for bleeding	15	14.3
Postop myocardial infarction*	16	15.2
Tracheostomy	4	3.8
Renal replacement therapy (n=104)***	3	2.9
Deep wound infection	0	0
Stroke	2	1.9
Multi system organ failure	2	1.9
Minor complications	62	59
Atrial fibrillation/flutter (n=97)**	41	42.3
Ventilator >48 hours	18	17.1
Pneumonia	12	11.4
Acute kidney injury (n=104)***	16	15.4
Superficial wound infection	6	5.7
Pleurocentesis	16	15.2
Pericardiocentesis	13	12.4
Intraoperative death	0	0
Surgical mortality (<30 days)	2	1.9

*CKMB >70 µg/L\*. Patients with history of atrial fibrillation/flutter were not included in the a.fib/flutter complication calculations\*\*. One patient with end stage kidney disease required renal replacement therapy before surgery and was not included in the calculations for acute kidney injury or renal replacement therapy after surgery\*\*\*.*
