

**Table II.** *Body Mass Index (BMI), depressive symptoms (BDI-II), anxiety symptoms (BAI) and quality of life (IQL) for gastric bypass participants and non-bypass participants.*

	Measurement 1 Before treatment median (n)	Measurement 2 After treatment median (n)	Measurement 3 ≥3 years post treatment median (n)
BMI			
with bypass	43,7(28)	40,9 *(28)	30,1* (18)
without bypass	40,9 †(72)	39,2 * (72)	40,32*‡ (31)
BDI-II			
with bypass	18 (26)	5 * (26)	8,5 * (18)
without bypass	13† (70)	3*(70)	11 (32)
BAI			
with bypass	6,5 (28)	2* (28)	7 (18)
without bypass	9(70)	2,5*(68)	8,5 (30)
IQL-quality of life			
with bypass	33 (25)	53* (25)	49* (17)
without bypass	40,5† (60)	51* (60)	47 (32)

\*within-group comparison  $p < 0,001$

‡between groups comparison  $p < 0,001$
