

Table II. Comparison of drug use between study groups prior to operation. Number of cases (%) is shown. Chi-square test was used to compare categorical variables.

	Two or more nights in ICU (n = 431)	One night in ICU (n = 1746)	p-value
Use of anticoagulant and antiplatelet drugs within 5 days before operation			
Aspirin	214 (55%)	774 (48%)	0.039
Heparin	203 (51%)	731 (45%)	0.047
Clopidogrel	42 (11%)	57 (4%)	<0.001
Warfarin	1 (0.25%)	7 (0.43%)	0.94
Other drugs used before operation			
β-blockers	298 (73%)	1216 (73%)	1.000
Statins	296 (72%)	1358 (80%)	<0.001
Calcium channel-blockers	89 (22%)	373 (24%)	0.66
