

Table II. Number of antibody tests for hepatitis A at the virology department of the National University Hospital of Iceland during the study period, and their results. Positive IgM antibodies confirm the diagnosis of acute hepatitis.

Year	Test	Positive	Negative	Total
2006 (from March 28th)	HAV total Ab	226	514	740
	HAV IgM	-	219	219
2007	HAV total Ab	322	734	1056
	HAV IgM	1	307	308
2008	HAV total Ab	285	661	946
	HAV IgM	1	274	275
2009	HAV total Ab	177	482	659
	HAV IgM	3	178	181
2010	HAV total Ab	184	367	551
	HAV IgM	2	183	185
2011	HAV total Ab	132	317	449
	HAV IgM	1	127	128
2012	HAV total Ab	134	296	430
	HAV IgM	4	128	132
2013	HAV total Ab	150	375	525
	HAV IgM	-	150	150
2014	HAV total Ab	145	329	474
	HAV IgM	-	143	143
2015	HAV total Ab	119	277	396
	HAV IgM	-	116	116
2016	HAV total Ab	153	312	465
	HAV IgM	-	147	147

HAV: hepatitis A virus. Ab: antibodies.
